

The Card Deck is a set of 52 cards and is divided into four suits that correspond to the Topic Booklets. The front of the cards have a photo related to the suit topic. The back of the cards include facts or statements related to the suit topic. The fact will not always be an exact match with the photo; there is only a general relationship to the overall suit topic.

Use the cards creatively; you may only need to use a few cards, one suit, or the entire deck. The cards can be used for individual or group exercises. Below are some ideas of how to use the Card Deck to engage a group of participants.

### ACTIVITY SUGGESTIONS

- Give each participant a card. Offer participants a few minutes to look at the card and think about how the contents of the photo impact the members of a community. Have each participant explain their image and their answer. For further discussion, ask participants how they came to their answer.
- Split participants into small groups of no more than four or five. Give each participant a card from each suit. Give participants a few minutes to look at the cards and think about how the contents of the photo impact the members of a community. Ask participants to discuss in their groups how they would improve or enhance the environment the photos depict.
- Split participants into groups of two. Hand each group a few cards. Have participants read the back of the card and create a question from the fact. Have participants quiz each other. Bring the groups together and have each participant say one thing they learned from the quiz.
- In advance of the session or meeting, review the facts on the cards and create a short question and answer game, similar to *Jeopardy*. Split participants into 2 or 3 groups for this activity.
- Give each participant a card; use cards from every suit. Have participants form pairs by having participants find another person with a card from a different suit. Have participants sit together and talk about how their two images relate to each other and relate to building healthy communities.
